

## MAIN FEATURES

The AIRFLY is a 2.1m ceiling fan that moves a large volume of air, available in black and white. This model adapts perfectly to rooms for domestic or commercial and even industrial use due to its dimensions and finishes.

Its built-in PMSM motor makes it more powerful and efficient, consuming low levels of energy. In addition, its useful life is long thanks to its high-quality materials with IP 54 and class H insulation.

The main features of the fan are:

- Silent and efficient.
- 5 iron aerodynamic blades.
- Connection and ceiling connection protector.
- Option to operate at different speeds.

## TECHNICAL CHARACTERISTICS

	AIRFLY
Diameter	2.1m (7ft)
Extension	0.5m (1.6ft)
Number of blades	5 (cast iron)
Power	280W
Voltage	220VAC   50/60 Hz
Maximum speed	200rpm
IP protection	IP54
Sound level	<45dBA
Weight	13kg
Type of motor	PMSM
Air flow	150 000m <sup>3</sup> /h
Maximum coverage	500 m <sup>2</sup>
Control	10 speed control
Insulation type	h
Standard colors	Black White
Certification	EC; IEC; RoHS
